
14 Acknowledgements (Illus 46)

The authors would like to thank the Clan Donald Centre, Armadale, and Roger Winkleman for allowing access to the croft. Steven Birch found the site, and he, Martin Wildgoose and George Kosikowski all undertook the pre-excitation work as well as providing valuable assistance both during and since the excavations. Historic Scotland are to be thanked for providing funds to get the project off the ground at short notice and for support throughout the 2000 field season. The advice of Noel Fojut has always been invaluable, particularly in the difficult circumstances of excavation; and Patrick Ashmore is especially to be thanked for keeping us on the right track regarding radiocarbon determinations, amongst other things. Katherine Selby kindly agreed to the use of information from her unpublished PhD thesis and assisted with the geomorphological interpretation of the raised beaches. Maureen Lamb and Ruth Neiland are thanked for laboratory assistance during the analysis of the on-site pollen. Brian Jackson of the National Museums of Scotland advised on the identification of the more unusual lithic raw materials and he and Suzanne Miller worked on the thin section of the greywacke. Logistical support during excavation was provided by the Centre for Field Archaeology and in particular Jill Strobridge, and also, for the main thrust of the post-excavation work, by the Department of Archaeology and Pat Storey. Kevin Hicks and Sylvia Stevenson worked on the illustrations. This text was read by Nyree Finlay and Graeme Warren: as ever they spotted things that were blindingly obvious but had escaped the authors: both are to be thanked for their time and for the constructive comments that they made. Finally, thanks to Mark Ferguson and Murdo Nicholson both of whom have helped us out at various times. Last, but not least, thanks must go to our families who continue to put up, good naturedly with the intrusion that the Mesolithic makes into their lives.

Illus 46 Camas Daraich: Thanks to Steven, Martin and George!
