List of illustrations

1	Prehistoric sites with quartz assemblages, or substantial quartz sub-assemblages. <i>Shetland</i> : 1) Bayanne, 2) Scord of Brouster, 3) Kebister, 4) Cruester, 5) Burland, 6) Tougs, 7) Catpund, 8) Sumburgh, 9) Jarlshof. <i>Western Isles</i> : 10) Barvas, 11) Dalmore, 12) Olcote, 13) Calanais, 14) Cnoc Dubh (quarry), 15) Valtos, 16) Northton, 17) Udal, 18) Eilean Domhnuill, 19) Rosinish. <i>Southern Hebrides and West Mainland</i> : 20) Redpoint, 21) Shieltaig, 22) Kinloch, 23) Camas Daraich, 24) Rudha'n Achaidh Mhòir (Morar), 25) Risga, 26) Carding Mill Bay, 27) Kilmelfort Cave, 28) North Carn Bay, 29) Lealt Bay, 30) Lussa River, 31) Lussa Wood, 32) Ellary Boulder Cave, 33) Auchategan. <i>Highlands and East Scotland</i> : 34) Lairg, 35) FERG Sites 4 and 5, 36) Ben Lawers. <i>Midland Valley</i> : 37) Fordhouse Barrow.	6
2	Kilmelfort Cave. Blades, bladelets and spalls	7
3	Kilmelfort Cave. Cores: one discoidal core, and three bipolar cores	7
4	Kilmelfort Cave. Crested pieces and tools: three crested blades/flakes, one end-scrapers, and one bladelet with edge-retouch	7
5	Shieltaig. Preparation flakes – four crested pieces, and one platform rejuvenation flake	10
6	Shieltaig. Platform cores: one discoidal core, and one irregular (multi-directional) core.	11
7	Shieltaig. Platform cores: three conical/sub-conical cores, and two opposed platform cores. No 5 was worked from one direction on one face, and from the opposite direction on the other face.	11
8	Shieltaig. Bipolar cores	13
9	Shieltaig. Microliths: ten geometric microliths, and one microburin	13
10	Shieltaig. Tools: one tanged implements, three end-scrapers, one side-scrapers, two piercers, and one piece with an oblique concave truncation (?knife).	13
11	Scord of Brouster. Single-platform core	14
12	Scord of Brouster. Bipolar cores. Nos 1 and 3 have been burnt	14
13	Scord of Brouster. Leaf-shaped points	15
14	Scord of Brouster. Curved knives. Note the scorched surface of No. 2 (upper right corner)	15
15	Scord of Brouster. End-scrapers. No. 8 has been burnt.	15
16	Scord of Brouster. Side- and side-/end-scrapers	17
17	Scord of Brouster. Piercers. No. 1 has been burnt	17
18	Calanais. Cores: one single-platform core, and one bipolar core	18
19	Calanais. Barbed-and-tanged arrowheads. No. 5 is probably a damaged rough-out	18
20	Calanais. Tools: three end-scrapers, one side-scrapers, and one flake with edge-retouch (?knife). No 4 may have been burnt	19
21	Seriation of British barbed-and-tanged arrowhead sub-types in relation to pottery styles (produced for Ashmore forthcoming)	20
22	Rosinish. Platform cores: one single-platform core, two irregular (multi-directional) cores, and one crested flake. No. 1 is distinctly burnt	21
23	Rosinish. Bipolar cores: Nos 1 and 6 are distinctly burnt	21
24	Rosinish. Scrapers: three end-scrapers, and two side-scrapers. No. 3 has split along the long-axis. No 4 (which is distinctly burnt) has a slightly concave working-edge along the left lateral side. No 5 (which was made on an abandoned bipolar core) has a simple working-edge along its right lateral side	22
25	Dalmore. Platform cores: core rough-out (with two crude opposed crest along the lateral sides), single-platform core (with its flaking-front to the left), and an irregular (multi-directional) core	24
26	Dalmore. Bipolar cores. No 2 has been burnt.	25
27	Dalmore. Barbed-and-tanged arrowheads: rough-outs, rejects, and almost complete specimens. No. 2 has been burnt. Nos 5 and 7 have characteristic Kilmarnock Type tangs (Green 1980, 123)	25
28	Dalmore. Tools: three end-scrapers, and one burnt piercer.	26
29	Bayanne. Cores: three single-platform cores, one opposed-platform core, one irregular (multi-directional) core, and one bipolar core.	30
30	Bayanne. Preparation flakes and tools: one crested flake, one core rejuvenation flake, one base of a barbed-and-tanged arrowhead (with residual barbs), two piercers, and one backed knife	31

31	Bayanne. Scrapers: four end-scrapers, one double-scrapers, one side-scrapers (working-edge along the left lateral side), and one side-/end-scrapers (the lateral working-edge is to the right side).	32
32	Burland. Platform cores: one large and one small irregular (multi-directional) core, and one small single-platform core (lower right corner)	34
33	Burland. Bipolar cores: two large specimens, and three smaller specimens	35
34	Burland. Scrapers: three end-scrapers, two side-scrapers (with a left and right lateral working-edge, respectively), and one concave scraper (furthest to the right)	36
35	Burland. Tools: one knife (backing along the right lateral side), two piercers, and one notched piece	36
36	Burland. Fabricators	37
37	The Cnoc Dubh quartz quarry, Lewis	39
38	Quartz crystals (Kongsberg, Norway).	43
39	Rock crystal. Microblade from southern Norway	47
40	Milky quartz. Scraper from Kilmelfort Cave, Argyll	47
41	'Greasy' quartz. Flakes and blades from Shieldaig, Wester Ross	48
42	Fine-grained quartz. Core from Scord of Brouster, Shetland	49
43	Coarse-grained quartz. Flake from Dalmore, Lewis	49
44	Quartzite. Part of a raw nodule from Glentaggart, South Lanarkshire	50
45	Wind-blown erratic quartz from various sites in Aberdeenshire.	51
46	Burnt and unburnt bipolar cores from Rosinish, Benbecula	51
47	The modules and sequences of most operational schemas. For detailed explanation and discussion (see Ballin forthcoming m)	63
48	Complete operational schema ('master schema'), including all modules of illus 5A (the numbers in the left column refer to this figure). For detailed explanation and discussion (see Ballin forthcoming m).	64
49	Platform cores as a percentage of the total number of cores, by assemblage. The assemblages are listed in chronological order, starting with the oldest (Kilmelfort Cave)	68
50	The length:width of the flakes, and the length:width and width:thickness of the bipolar cores from Burland. The flakes and bipolar cores obviously represent two different populations; in each diagram a trendline has been inserted, and a correlation coefficient (R^2) calculated, for each population	71
51	The main stages in the Dalmore operational schema (a simplified version of Callahan 1987, illus 97).	72
52	Dalmore. The distribution of all lithic finds from Sharples' excavation. The red wavy line marks the outer limits of the horizontal distribution of lithic artefacts, whereas the finer black contours demonstrate the concentration of these finds. The stippled 'polygon box' indicates the approximate location of the main, undivided oval building (which was re-arranged and divided in the later phases; Sharples 1983a; Sharples 1983b), and the circle (marked H) represents the central slab-built hearth of Phase II (Context 082). Contours at 1 piece intervals (lowest contour = 3 pieces)	80
53	Dalmore. The distribution of burnt lithics from Sharples' excavation. Contours at 1 piece intervals (lowest contour = 1 piece)	81
54	The dates of the three Scord of Brouster houses	83
55	Rosinish. The distribution of quartz flakes. Contour intervals: 1 piece (0-6), 2 pieces (>6); lowest contour: 1 piece. The location of Crawford's 1964 excavation is indicated (Crawford 1977)	86

List of tables

1	The Kilmelfort cave lithic assemblage: general artefact list	8
2	The Lealt Bay quartz sub-assemblage: general artefact list	8
3	The Lussa River quartz sub-assemblage: general artefact list.	9
4	The Shieldaig quartz sub-assemblage: general artefact list	12
5	The Scord of Brouster lithic assemblage: general artefact list (if the raw material of a type is not specified, all pieces are in quartz)	16
6	The Calanais lithic assemblage: general artefact list	19
7	The Rosinish lithic assemblage: general artefact list	23
8	The combined Dalmore lithic assemblage: general artefact list	27
9	The combined lithic assemblage from FERG Sites 4 and 5: general artefact list	28
10	The Bayanne lithic assemblage: general artefact list	30
11	The Cruester lithic assemblage: general artefact list	33
12	The Burland lithic assemblage: general artefact list.	34
13	The Barvas 2 lithic assemblage: general artefact list	37
14	The Catpund lithic assemblage: general artefact list	38
15	Moh's hardness scale.	44
16	The quartz types applied in the present volume compared with the ones suggested by Jones (forthcoming).	46
17	The burnt quartz ratio of a number of assemblages from the northern and western parts of Scotland	51
18	Quartz and other raw material frequencies in the various Scottish regions. (i) At Barvas, only the numerically less important Barvas 2 assemblage has been analysed and quantified; (ii) in the published reports, flint was counted as part of a more general raw material group, 'chalcedonic silica', which includes, inter alia, flint, chert and chalcedony	54
19	A number of Neolithic and Bronze Age settlement and ritual sites along the Lewisian west coast, their individual distances, and dominating quartz types	55
20	The assemblage from Sharples' excavation. The distribution of the main raw materials by artefact categories	59
21	The assemblage from Rosinish. The distribution of the main raw materials by artefact categories	59
22	The assemblage from Shieldaig. The distribution of the main raw materials by artefact categories	60
23	Foraging or logistical conditions by site (Brockinton 1992, 96). * = inconclusive	66
24	Core preparation and rejuvenation flakes in the analyzed quartz assemblages	67
25	The selected assemblages, their ratios of platform and bipolar cores, quartz ratios, and dominant quartz forms. The assemblages are listed in chronological order, starting with the oldest (Kilmelfort Cave).	69
26	Flatøy XI. Attributes for blades in flint and quartzite	70
27	The tool ratios of a number of quartz-bearing 'multi-material' assemblages	72
28	Bayanne. The events and their relative ratios	79
29	Horizontal distribution of artefacts – Phase 3	82
30	Scord of Brouster, Houses 1 and 2. The proportions of the main tool categories	84
